TRIVIUM

1	**Input** (Grammar, Knowledge)	Gathering data from an eclectic array of sources ***without*** pre-judging it	Answers *Who?*, *What?*, *When?*, & *Where?* *(raw data)*
2	**Processing** (Logic, Understanding)	Comprised of 3 basic sub-steps: Filtration, Correlation, & Analysis (Quadrivium largely utilized here)	Enables us to learn *Why? (What is the reason, meaning, or purpose?)*
3	**Output** (Rhetoric, Wisdom)	Speech and action based upon the knowledge that one has gathered and understands	This is *How* Knowledge and Understanding are propagated so that real and positive change can be created
